Asset Register - 02.3B - Emergency Exit Light Service Record							
Asset ID	Building Location	Baseline Data	Equipment Number	LFP Quote Number:	Date	Service	Pass / Fail
93647	Entire Site	N/A	-		23/04/2025	Yearly	Fail
Test Readings	Work Order Number:: MAR 25 SM		Site Attendance Record Number:: A		---TABLE A1 SCHEDULE 1—SIX-MONTHLY—SERVICE AND MAINTENANCE RECORDS : 2025-04-23		
	--- 1.1 Service and maintenance records Check the service and maintenance records and confirm the previous scheduled inspection and/or test was completed and within tolerance: Pass		--- 1.2 Service and maintenance records—Critical defects Check the service and maintenance records and confirm any previously recorded critical defects have been rectified: Pass		--- 1.3 Service and maintenance records—Non-critical defects Check the service and maintenance records and confirm any previously recorded non-critical defects have been rectified or other actions taken: Pass		
	---1.4 Service and maintenance records—Non-conformances Check the service and maintenance records and confirm any previously recorded non-conformances have been rectified or other actions taken: Pass		--- 1.5 Service and maintenance records—Observations Check the service and maintenance records and review any previously recorded observations: Pass		TABLE A2 SCHEDULE 2—SIX-MONTHLY—SELF CONTAINED EMERGENCY LUMINAIRES AND EXIT SIGNS: 2025-04-23		
	--- 2.1 Emergency luminaire, exit and directional signs Inspect each emergency luminaire or exit sign. Record if it is functioning, i.e. operating as required.: Fail		--- 2.2 Emergency luminaire, exit and directional signs—Condition Check each emergency luminaire or exit sign is free from significant damage, deterioration, contamination or other condition that is likely to adversely affect its function. Record outcome, e.g. noted, replaced, cleaned. See Notes 1 and 2.: Pass		--- 2.3 Exit and directional signs—Direction to required exit Inspect each emergency exit and directional sign. Confirm the sign is directing traffic correctly in accordance with the approved design: Fail		
	--- 2.4 Exit and directional signs—Sensors or other controls Inspect each emergency exit and directional sign, (i.e. internally illuminated, dual function or low luminance—theatre exits or externally illuminated exit signs) are not on a sensor or time controlled circuit. Record result.: Pass		--- 2.5 Requirements for exit signs Check all exit signs for correct situational use in accordance with the baseline data. Record a pass if all exit signs are suitable for situational use. NOTE: Each type of exit sign (internally illuminated, low luminance or externally illuminated) has distinct applications.: Pass		--- 2.6 Automatic test systems, control and indicating equipment—Condition Inspect control and indicating equipment for any condition for that could adversely affect its operation. See Note 3.: Fail		
	--- 2.7 Emergency luminaire and exit signs—Initiate duration test Initiate the operation of each emergency luminaire and exit sign by simulating the loss of primary power using the designated test facility, which may be automatic, manual, circuit breaker or fuse. RECORD start time.: Entire site was tested over multiple days between march & April		--- 2.8 Emergency luminaire and exit signs—Duration test Inspect each emergency luminaire or exit sign for the required duration. Record the pass/fail result for each fitting. (The record may be via self-test indication, automatic or manual methods.): Fail		--- 2.9 Defined service life Check the log book and baseline data for any emergency luminaire, exit sign or component with a defined service life. Record each item that has exceeded the defined service life or is due for replacement before the next scheduled maintenance activity.: Pass		
	--- 2.10 Check each initiated discharge system is reverted to normal operation Inspect each automatic or manual discharge test facility and ensure it has been returned to normal operation.: Fail		--- 2.11 Check externally illuminated exit sign. Greater than 200 lx is required on face Measure illumination on face of any externally illuminated (i.e. image on wall) exit sign. Record measured result. Record higher than 100 lx. Pass if greater than 200 lx.: N/A		NOTES: 1 Refer to Appendix C for information on cleaning. 2 Conditions affecting exit signs include any aspect that may affect the visibility of an exit sign. Specular reflectance on the face of an exit sign may reduce sign readability at certain viewing angles. This should be considered by installers and in maintenance. For example, a window or bright light may be reflected in the face of an exit sign such that it is difficult to read. 3 Refer to Appendix F for guidance on computer system maintenance for automatic test systems.: 2025-04-23		
	--- TABLE A4 SCHEDULE 4—YEARLY—SELF CONTAINED EMERGENCY LUMINAIRES AND EXIT SIGNS: 2025-04-23		--- 4.1 Six-monthly service Conduct each activity set out in Schedules 1, 2, and 3, as appropriate. Confirm each activity has been completed and record the results: Pass		--- 4.2 Indirect lighting systems—Reflecting surfaces (where fitted) Inspect the finish of predominant reflecting surfaces, including ceilings and walls for any change that could adversely affect the approved design: Pass		
	--- 4.3 Directional beam luminaires (where fitted) Inspect each directional beam is aimed in accordance with the approved design and it is not directed into the eyes of the occupants while moving through		--- 4.4 Normal lighting and emergency operating relationship Inspect the emergency luminaire and exit sign is in the correct relationship to the normal lighting in the designated area. (See general		--- 4.5 Emergency luminaire and exit signs—Tubular fluorescent lamps Inspect each emergency luminaire or exit sign fitted with a tubular fluorescent lamp. Replace any lamp with excessive

the path of travel to a required exit: Pass	requirements for the arrangement and control of emergency luminaires and exit signs in AS/NZS 2293.1.): Fail	end-blackening: Fail
--- 4.6 Exit signs—Performance reduction through light emission depreciation Inspect each exit sign to ensure it is operating, is distinctly visible and that there has been no visually significant reduction in light output or brightness: Fail	--- 4.7 Exit signs—Externally illuminated Inspect each exit sign location. Ensure the associated emergency luminaire is operating and exit sign is distinctly visible: N/A	--- 4.8 LSL (end of light source life) Check each emergency luminaire or exit sign has sufficient LSL remaining to achieve next routine service. Once LSL is achieved, refer to Table A6. Refer to Notes 2 and 3.: Pass
--- 4.9 Survey—Emergency light and exit sign schedule Check the emergency luminaire or exit sign against the listing of products installed or location listing or drawings for any condition, alteration or addition since the last scheduled maintenance activity: N/A	--- 4.10 Survey—Fire control centre (where fitted) Inspect and test each required fire control centre to verify the minimum illumination requirement achieves the approved design: N/A	--- 4.11 Survey—Emergency Luminaires Inspect the building to ensure there is adequate emergency lighting in accordance with the approved design: N/A
--- 4.12 Survey—Exit and directional signs Inspect the building to ensure that there is adequate identification of exits and paths of travel to exits, in accordance with the approved design; i.e. check for unauthorized modification of building use since last audit: N/A	--- 4.13 Inspect—Nonmaintained exit signs Check non-maintained exit signs are illuminated when smoke detectors are fitted and activated: N/A	--- 4.14 LED-maintained emergency luminaires— Performance reduction through light emission depreciation Where no manufacturer LSL specified the ongoing viability of the installed luminaires shall be assessed in accordance with Clause 3.5.2. Check the spacing between emergency luminaires is in accordance with the classification determined above.: N/A
--- 4.15 LED exit signs or directional signs— Performance reduction through light emission depreciation Where no manufacturer declared LSL specified, the ongoing viability of the installed signs shall be assessed in accordance with Clause 3.5.2.3.: N/A	NOTES: 1 Where fitted, recognizes that the absence of elements or components of a system that were not required as part of the approved design need not be retrofitted and the related routine service activity is not to be considered a defect or non-conformance if not performed. 2 LED manufacturer's LSL is as shown in AS/NZS 2293.3. It is based on L70 values calculated from the in-situ temperature measurement temperature applied using IEC 63013 or the IES TM-21 or IES TM-28 methodology. 3 The LSL is a basic requirement checked each year, as the LSL may be rated as some other period than 1, 5 or 10 years, i.e. 4 or 7 years. For example, If LSL is stated as being 7 years, it will be necessary to apply the LSL test conditions, once the luminaire has been in service for 7 years. 4 Exit sign type may include internally illuminated, exit sign only or dual function (emergency luminaire and exit sign), low luminance—theatre exits or externally illuminated (image on wall) signs.: 2025-04-23	--- TABLE A6 SCHEDULE 6—10 YEARLY AND END OF LIGHT SOURCE LIFE (LSL) OF MAINTAINED—LED LUMINAIRES AND EXIT SIGNS: 2025-04-23
--- 6.1 Six-monthly and yearly services—All systems Conduct each activity set out in Schedules 1 to 5, as appropriate. Confirm each activity has been completed and record results: Fail	--- 6.2 Maintained LED emergency luminaires and dual function exist signs—LSL Manufacturer declared LSL specified in the baseline data. The ongoing viability of the installed luminaire/exit sign shall be assessed (rounded to the nearest year) in accordance with Clause 3.5.2.5.: N/A	--- 6.2 Maintained LED emergency luminaires and dual function exist signs—LSL- Check the spacing between emergency luminaires is in accordance with the classification determined above: N/A
--- 6.3 LED exit signs or directional signs—LSL Manufacturer declared LSL specified in the baseline data. The ongoing viability of the installed LED signs shall be assessed at the end of the specified LSL (rounded to the nearest year) in accordance with Clause 3.5.2.6: N/A	Have all previously reported defects been rectified: N/A	Queensland Buildings Only: I hereby acknowledge that the mentioned system above has been routinely serviced in accordance with Australian Standard AS1851-2012 Amendment 1 & AS2293.2 and that the information on this report is true and correct. This record does not infer compliance of all applicable building and fire legislation within the relevant jurisdiction - Queensland Buildings Only - Maintenance complies with QDC, MP6.1.: Yes
